

IDEAL FOR YOUR NEXT EVENT

Big enough to showcase your event at its best, but not too big to overwhelm, the MacDon Exhibition and Training Centre is the ideal venue for everything from intimate training seminars to mid-size industry trade shows. It is equipped with everything you need to make your event a success, and boasts special expertise in hosting events for the agricultural industry. Just check out all of the features available to you, and we're sure you'll agree that the MacDon Exhibition and Training Centre is ideal for your next event.

The 94 seat theatre with elevated seating features a motorized front wall, allowing the opening of the wall during presentations to reveal the main exhibition hall. This feature is ideal for large presentations that require extra space (such as machinery), as all guests are assured an excellent view from the comfort of their chair.

The main exhibition hall with its 32' high ceiling is large enough to allow the showcasing of large machinery, or extra large displays. There is venting equipment available to permit the running of machinery for short periods within the exhibition hall.

MACDON EXHIBITION AND TRAINING CENTRE
